HULU BEJE

CUSTOMER ACCOUNTS AND SECURITY POLICY

DOCUMENT ID: HULU-BEJE-KB-008

DOCUMENT TITLE: Customer Accounts & Security

DOCUMENT TYPE: Business Knowledge

COMPANY: Hulu Beje

COUNTRY: Ethiopia

==========

1. DOCUMENT PURPOSE

==========

This document defines the general business policies and customer

information related to Hulu Beje customer accounts, account access,

account security, identity verification, account recovery, and protection of customer information.

It covers:

- Customer account creation
- Registration
- Login
- Passwords
- Password reset
- Account recovery
- Customer profile information
- Email and phone information
- Delivery addresses
- Saved account information

- Account changes
- Account security
- Suspicious account activity
- Unauthorized account activity
- Unknown orders
- Account lockouts
- Account suspension
- Account deletion
- Account deactivation
- Logout
- Shared devices
- Phishing and scams
- Authentication information
- Verification requests
- Payment security

- Customer privacy

- Account-specific support

- Security incidents

- Human support and escalation

The exact account features available to customers may depend on the current Hulu Beje service.

==========

2. CUSTOMER ACCOUNT OVERVIEW

==========

A customer account allows a customer to use account-related Hulu Beje services and manage applicable customer information.

An account may allow customers to:

- View orders
- Manage profile information
- Manage delivery addresses
- Review account information
- Manage applicable security settings
- Access customer-specific services
- Contact support regarding account-related matters

Customers are responsible for keeping their account information and access credentials secure.

==========

3. ACCOUNT REGISTRATION

==========

Customers may create an account by providing the information required during registration.

Registration information may include:

- Name
- Email address
- Phone number
- Password
- Other required account information

Customers should provide accurate information.

==========

4. ACCURATE ACCOUNT INFORMATION

==========

Customers should keep their account information accurate and

up-to-date.

Incorrect information may cause problems with:

- Account communication

- Order communication

- Delivery

- Account recovery

- Customer support

- Security verification

==========

5. ACCOUNT ELIGIBILITY

==========

Customers must meet any applicable requirements for using Hulu Beje services.

Certain services may have additional requirements depending on the product, transaction, location, or applicable terms.

==========

6. LOGIN

==========

Customers should use their own account credentials to access their accounts.

Customers should not share their login credentials with other people.

If a customer believes another person has accessed the account, the customer should take appropriate security action and contact support where necessary.

==========

7. PASSWORD SECURITY

==========

Customers should create a strong and unique password.

A customer should avoid using easily guessed information such as:

- Name
- Phone number
- Birthday
- Simple sequences
- Common passwords

Customers should avoid reusing the same password across different services when possible.

==========

8. PASSWORD CONFIDENTIALITY

==========

Customers should never intentionally share their account password with other people.

Hulu Beje customer support should not require a customer to disclose their account password.

Customers should be suspicious of anyone requesting a password while claiming to represent Hulu Beje.

==========

9. PASSWORD RESET

==========

Customers who forget their password may use the applicable password reset process.

A password reset may require verification using information associated

with the account.

Customers should follow the instructions provided through the

authorized account recovery process.

==========

10. PASSWORD RESET PROBLEMS

==========

If a customer cannot reset a password, possible reasons may include:

- Incorrect account information

- Inaccessible email or phone number

- Incorrect verification information

- Expired reset information

- Account restrictions

- Other account-related conditions

Customers should contact support if the normal recovery process does not resolve the issue.

==========

11. ACCOUNT RECOVERY

==========

Account recovery is the process of restoring access to an account when a customer cannot log in.

Recovery may require verification that the requester is the legitimate account owner.

Customers should provide only information necessary for account verification.

==========

12. EMAIL ADDRESS

==========

An email address may be used for:

- Account communication
- Order communication
- Password recovery

- Security notifications

- Other applicable customer communication

Customers should keep the email address associated with the account

accurate and accessible.

==========

13. PHONE NUMBER

==========

A phone number may be used for:

- Customer communication

- Delivery communication

- Account verification

- Security-related communication

- Other applicable services

Customers should keep their phone number accurate and reachable.

==========

14. CHANGING EMAIL OR PHONE INFORMATION

==========

Customers may be able to update account contact information through the applicable account settings or support process.

A change may require verification to protect the account.

Customers should report unexpected changes immediately.

==========

15. CUSTOMER PROFILE

==========

A customer profile may contain information such as:

- Name

- Contact information

- Saved addresses

- Account preferences

- Other applicable information

Customers should review their profile information periodically.

==========

16. DELIVERY ADDRESS VS ACCOUNT ADDRESS

==========

A customer may have one or more saved addresses associated with an account.

The address saved in the account is not necessarily the same as the delivery address for a particular order.

Customers should review the delivery address before placing each order.

Changing a saved account address does not automatically mean that an existing order's delivery address has changed.

==========

17. SAVED ADDRESSES

==========

Customers may save commonly used addresses where this feature is available.

Saved addresses may include:

- Home
- Office
- School
- Other permitted delivery locations

Customers should remove or update outdated addresses when necessary.

==========

18. ACCOUNT INFORMATION CHANGES

==========

Customers should update information when it changes.

Examples include:

- Name
- Phone number
- Email address
- Saved address
- Other profile information

Important account changes may require additional verification.

==========

19. ACCOUNT SECURITY

==========

Customers should take reasonable steps to protect their accounts.

Important practices include:

- Use a strong password

- Do not share passwords

- Do not share authentication codes

- Use only authorized account access methods

- Log out from shared devices

- Be cautious of suspicious messages

- Review unexpected account activity

- Report suspected unauthorized access

==========

20. AUTHENTICATION INFORMATION

==========

Authentication information may include:

- Password

- One-time verification code

- Authentication token

- Account recovery information

- Other security credentials

Customers should keep authentication information confidential.

==========

21. ONE-TIME PASSWORDS AND VERIFICATION CODES

==========

Customers should never share a one-time password, verification code,

or authentication code with another person.

A legitimate support representative should not require customers to

disclose confidential authentication codes unnecessarily.

If a customer receives an unexpected verification code, the customer

should not share it.

==========

22. PASSWORDS, OTPs AND SECURITY CODES

==========

Customers should never provide the following to an unknown or

unverified person:

- Account password

- One-time password

- Authentication code

- Account recovery code

- Security code

Customers should treat unexpected requests for such information as potentially suspicious.

==========

23. PAYMENT SECURITY

==========

Customers should protect their payment information in addition to their account information.

Customers should not provide sensitive payment credentials through unverified communication channels.

Hulu Beje should not require customers to disclose:

- Full payment card number unnecessarily

- Card security code

- Account password

- One-time payment authentication code

==========

24. SUSPICIOUS ACCOUNT ACTIVITY

==========

Customers should report suspicious activity such as:

- Unknown login activity

- Unexpected password changes

- Unknown email or phone changes

- Unknown orders

- Unknown address changes

- Unexpected payment activity

- Unrecognized account communication

- Other unexplained account changes

==========

25. UNKNOWN ORDERS

==========

If a customer sees an order they did not place, the customer should

treat the matter as a potential account security issue.

The customer should:

1. Review the order information.

2. Avoid sharing account credentials.

3. Secure the account where possible.

4. Contact Hulu Beje support.

5. Review related payment activity where applicable.

==========

26. UNKNOWN ACCOUNT CHANGES

==========

Unexpected changes to an account may include:

- Password changes

- Email changes

- Phone changes

- Address changes

- Profile changes

- Order activity

Customers should report suspicious changes promptly.

==========

27. UNAUTHORIZED ACCOUNT ACCESS

==========

If a customer believes an unauthorized person accessed the account,

the customer should secure the account immediately where possible.

Recommended actions may include:

- Change the password

- Secure the associated email account

- Review recent orders

- Review account information

- Report the incident to support

==========

28. ACCOUNT TAKEOVER CONCERNS

==========

An account takeover may occur when an unauthorized person gains

control of a customer's account.

Warning signs may include:

- Password no longer works

- Contact information changed unexpectedly

- Unknown orders

- Unknown account activity

- Unexpected security notifications

- Customer cannot recover the account normally

Such issues should be reported promptly.

==========

29. ACCOUNT LOCKOUT

==========

An account may become temporarily inaccessible after repeated

unsuccessful access attempts or for other security reasons.

Customers should follow the applicable recovery instructions.

Repeated attempts to access an account using incorrect credentials may

delay recovery.

==========

30. ACCOUNT SUSPENSION

==========

An account may be restricted or suspended in certain circumstances.

Possible reasons may include:

- Security concerns

- Suspected misuse

- Fraud concerns

- Violation of applicable terms

- Other legitimate account-protection reasons

The applicable account terms determine the process for resolving a suspension.

==========

31. ACCOUNT DEACTIVATION

==========

A customer may be able to deactivate an account where the applicable service provides that option.

Deactivation may affect:

- Account access

- Order history access

- Saved information

- Customer communication

- Other account services

Customers should review the applicable account conditions before deactivation.

==========

32. ACCOUNT DELETION

==========

Customers may request account deletion where applicable.

Account deletion may affect access to:

- Account information
- Order history
- Saved addresses
- Preferences
- Other account services

Certain information may need to be retained where required or permitted by applicable obligations.

==========

33. ACCOUNT DELETION VS LOGOUT

==========

Logging out only ends the current account session on a device.

Account deletion removes or deactivates the account according to the applicable process.

Logging out does not delete the account.

==========

34. SHARED DEVICES

==========

Customers using a shared computer, phone, or other device should protect their account.

Customers should:

- Log out after use

- Avoid saving passwords on shared devices

- Avoid sharing authentication information

- Review account activity if access was shared

==========

35. PUBLIC OR UNTRUSTED DEVICES

==========

Customers should be cautious when accessing their account from public or untrusted devices.

Customers should avoid storing account credentials on such devices.

After use, customers should log out and close the account session.

==========

36. PHISHING

==========

Phishing is an attempt to trick a person into providing confidential information or accessing a fraudulent service.

Suspicious messages may:

- Request passwords
- Request verification codes
- Request payment information

- Create unnecessary urgency

- Ask customers to click suspicious links

- Claim that an account will immediately be closed

- Request unusual payments

- Impersonate customer support

Customers should verify the source before providing information.

==========

37. SCAM MESSAGES

==========

Customers should be cautious of messages claiming to offer:

- Unexpected prizes

- Special refunds

- Unusual discounts

- Account recovery

- Delivery payments

- Urgent account verification

- Unusual seller opportunities

Customers should verify suspicious requests through official Hulu Beje communication channels.

==========

38. FRAUDULENT REPRESENTATION

==========

No person should falsely represent themselves as Hulu Beje support,

seller personnel, delivery personnel, or another authorized party.

Customers who suspect impersonation should report it through the

applicable support process.

==========

39. SECURITY NOTIFICATIONS

==========

Customers may receive security-related notifications when applicable.

Such notifications may relate to:

- Password changes

- Account recovery

- Contact-information changes

- Suspicious activity

- Other account-security events

Customers should review unexpected notifications carefully.

==========

40. IDENTITY VERIFICATION

==========

Certain account actions may require identity or account verification.

Verification may be used to protect customer accounts and prevent

unauthorized access.

Customers should provide only information reasonably required for the specific verification process.

==========

41. CUSTOMER IDENTITY AND ACCOUNT ACCESS

==========

Customer-specific account information should only be disclosed after appropriate verification where required.

This may include information about:

- Orders
- Addresses
- Payment activity

- Account settings

- Personal information

==========

42. UNAUTHENTICATED CUSTOMER QUESTIONS

==========

General business questions can often be answered without accessing

private account information.

Examples include questions about:

- General delivery policy

- General return policy

- General payment methods

- General product policies

- General promotions

Account-specific information requires appropriate verification.

==========

43. ACCOUNT-SPECIFIC SUPPORT

==========

Account-specific support may involve:

- Order history

- Account contact information

- Saved addresses

- Payment-related order information

- Security incidents

- Account recovery

Customers may need to verify their identity before account-specific information is discussed or changed.

==========

44. CUSTOMER DATA MINIMIZATION

==========

Only information necessary to handle a customer request should be requested.

Customers should not be asked to provide unnecessary personal or security information.

==========

45. PASSWORD REQUESTS

==========

Customer support should not request a customer's account password.

Customers should never provide their password merely because someone claims to be support personnel.

==========

46. OTP AND AUTHENTICATION CODE REQUESTS

==========

Customer support should not unnecessarily request one-time passwords,

authentication codes, or other confidential security credentials.

Customers should never share unexpected verification codes.

==========

47. PAYMENT CARD SECURITY

==========

Customers should protect payment card information.

Customers should not share:

- Full card details unnecessarily

- Card security code

- Payment authentication codes

- Account passwords

Payment-related questions should be handled through authorized channels.

==========

48. ACCOUNT SECURITY AND ORDERS

==========

Account security is closely connected to order security.

If a customer discovers an unknown order, the customer should also review account and payment activity where applicable.

==========

49. ACCOUNT SECURITY AND DELIVERY ADDRESSES

==========

An unexpected address change may be a security warning sign.

Customers should report an address change they did not make.

Customers should also verify delivery addresses before confirming new orders.

==========

50. ACCOUNT SECURITY AND PAYMENT ACTIVITY

==========

Unexpected payment activity should be reported promptly.

Customers should review:

- Payment amount
- Payment date
- Related order
- Payment method
- Transaction information

where available.

============================================================

51. SECURITY INCIDENT REPORTING

============================================================

Customers should report suspected security incidents as soon as possible.

Examples include:

- Account takeover
- Unknown orders
- Unauthorized account changes
- Suspicious payment activity
- Phishing attempts
- Fraudulent communication
- Stolen account credentials

==========

52. HUMAN SECURITY ESCALATION

==========

Security-related concerns may require human review.

Examples include:

- Suspected account takeover
- Unknown financial activity
- Identity disputes
- Repeated account recovery failure
- Suspicious account changes
- Fraud allegations
- Security incidents involving multiple orders

==========

53. ACCOUNT RECOVERY INFORMATION

==========

Customers should keep their recovery information accurate and accessible.

If recovery information is outdated, account recovery may be more difficult.

Customers should update recovery information through authorized account processes.

==========

54. CHANGING PASSWORD AFTER A SECURITY INCIDENT

==========

If an account may have been compromised, the customer should change the account password where possible.

Customers should also consider whether the associated email account requires additional security action.

==========

55. REUSED PASSWORDS

==========

If a customer uses the same password for multiple services and that password may have been exposed, the customer should consider changing the password on the affected services.

A unique password helps reduce the impact of a compromised credential.

==========

56. ACCOUNT ACCESS ON MULTIPLE DEVICES

==========

Customers may access their accounts from multiple permitted devices.

Customers should ensure that only trusted people have access to those devices.

If a device is lost or shared unexpectedly, the customer should secure the account.

==========

57. LOST OR STOLEN DEVICE

==========

If a device containing an active Hulu Beje account session is lost or stolen, the customer should take reasonable steps to protect the account.

Possible actions include:

- Secure the device
- Change the account password
- Log out where possible
- Review account activity
- Contact support if unauthorized activity is suspected

==========

58. ACCOUNT COMMUNICATION

==========

Customers should pay attention to official account communication.

Important messages may relate to:

- Orders
- Delivery
- Payments
- Security
- Account changes
- Support requests

Customers should be cautious of unexpected requests for confidential information.

==========

59. ACCOUNT PRIVACY

==========

Customer account information should be handled as private information.

Account information should not be disclosed to unauthorized people.

==========

60. CUSTOMER SUPPORT AND PRIVACY

==========

When contacting support, customers should provide only the information necessary to identify and resolve the issue.

Customers should not send unnecessary sensitive information.

==========

61. ACCOUNT INFORMATION OF ANOTHER CUSTOMER

==========

A customer should not request or receive private account information belonging to another customer.

Customer information should be disclosed only to authorized persons through applicable procedures.

==========

62. FAMILY AND SHARED ACCOUNTS

==========

Customers should understand that sharing an account can create privacy and security risks.

Where individual accounts are available, each customer should use their own account rather than sharing credentials.

==========

63. CUSTOMER ACCOUNT AND SELLER INFORMATION

==========

Customer account information and seller information should remain

appropriately separated.

Customers should not receive private seller account information that

is not intended for customer access.

==========

64. CUSTOMER RESPONSIBILITIES

==========

Customers are responsible for:

- Protecting their password

- Protecting verification codes

- Keeping account information accurate

- Keeping recovery information accessible

- Reviewing unexpected account activity

- Reporting suspected unauthorized access

- Using authorized account channels

- Logging out from shared devices

- Protecting payment information

- Providing accurate information during account recovery

==========

65. FORBIDDEN SECURITY BEHAVIOR

==========

Customers should not:

- Share passwords unnecessarily

- Share one-time passwords

- Share authentication codes

- Provide payment security codes to unknown persons

- Attempt to access another customer's account

- Use another person's credentials

- Circumvent account restrictions

- Impersonate another customer

- Attempt to bypass security controls

- Misuse account recovery processes

============================================================

66. ACCOUNT SECURITY SUPPORT

============================================================

Customer support may assist with:

- Password recovery

- Account access problems

- Suspicious account activity

- Unknown orders

- Unexpected account changes

- Account information corrections

- Security concerns

- Account suspension questions

- Account deletion questions

Security-sensitive cases may require additional verification or

specialist review.

==========

67. COMMON ACCOUNT FAQ

==========

QUESTION:

I forgot my password. What should I do?

ANSWER:

Use the applicable password reset or account recovery process.

QUESTION:

Can I give my password to customer support?

ANSWER:

No. Customers should keep passwords confidential.

QUESTION:

Can I share my OTP with support?

ANSWER:

Customers should not share one-time passwords or authentication codes

with another person.

QUESTION:

I received a verification code that I did not request. What should

I do?

ANSWER:

Do not share the code. If the activity is unexpected, secure the

account and contact support where necessary.

QUESTION:

Someone changed my account information. What should I do?

ANSWER:

Treat the change as potentially suspicious, secure the account, and

contact support.

QUESTION:

I see an order that I did not place. What should I do?

ANSWER:

Review the order information, secure the account, and contact support

promptly.

QUESTION:

Someone may have accessed my account. What should I do?

ANSWER:

Change the password where possible, review account activity, and

contact support if unauthorized access is suspected.

QUESTION:

Can I use my account on another device?

ANSWER:

Account access may be available on permitted devices. Customers should

ensure that only trusted people can access the account.

QUESTION:

What should I do if I lose my phone?

ANSWER:

Take reasonable steps to secure the account and associated communication channels, especially if the device had an active account session.

QUESTION:

Can I change my email address?

ANSWER:

An email address may be changed through the applicable account or support process and may require verification.

QUESTION:

Can I change my phone number?

ANSWER:

A phone number may be changed through the applicable account or support process and may require verification.

QUESTION:

Does changing my account address change my existing order?

ANSWER:

Not necessarily. The delivery address of an existing order is managed separately and may require a specific order change.

QUESTION:

Can support tell me another customer's order information?

ANSWER:

No. Customer-specific information should only be disclosed to

authorized persons.

QUESTION:

Why do I need to verify my identity?

ANSWER:

Verification helps protect customer accounts and prevent unauthorized

access to private information.

QUESTION:

Can I delete my account?

ANSWER:

Account deletion may be available depending on the current service.

Customers should follow the applicable account-deletion process.

QUESTION:

Does logging out delete my account?

ANSWER:

No. Logging out only ends the current account session.

==========

68. COMMON ACCOUNT SECURITY SCENARIOS

==========

SCENARIO 1:

Customer forgot their password.

GENERAL INFORMATION:

Direct the customer to the applicable password reset or recovery process.

SCENARIO 2:

Customer receives an unexpected OTP.

GENERAL INFORMATION:

The customer should not share the OTP and should investigate possible unauthorized account activity.

SCENARIO 3:

Customer sees an unknown order.

GENERAL INFORMATION:

The account and order should be treated as potentially compromised and reviewed promptly.

SCENARIO 4:

Customer's email address was changed without permission.

GENERAL INFORMATION:

The customer should secure the account and contact support for assistance.

SCENARIO 5:

Customer's phone number was changed without permission.

GENERAL INFORMATION:

The customer should report the unexpected change and follow the account recovery or security process.

SCENARIO 6:

Customer receives a suspicious message asking for their password.

GENERAL INFORMATION:

The customer should not provide the password and should verify the communication through an authorized channel.

SCENARIO 7:

Customer receives a message asking for a payment security code.

GENERAL INFORMATION:

The customer should not provide the code to an unknown or unverified

person.

SCENARIO 8:

Customer lost a device with an active account session.

GENERAL INFORMATION:

The customer should take reasonable steps to secure the account and review account activity.

SCENARIO 9:

Customer cannot recover their account.

GENERAL INFORMATION:

The customer may need additional identity or account verification and human support.

SCENARIO 10:

Customer wants another person's account information.

GENERAL INFORMATION:

Private customer information should not be disclosed to unauthorized

persons.

==========

69. SECURITY INCIDENT RESPONSE PRINCIPLES

==========

When a security concern is reported:

1. Treat the report seriously.

2. Protect customer privacy.

3. Do not request unnecessary sensitive information.

4. Do not request passwords.

5. Do not request unnecessary OTPs or authentication codes.

6. Verify the customer's identity when appropriate.

7. Review the relevant account information.

8. Identify affected orders or transactions where applicable.

9. Secure the account where appropriate.

10. Escalate complex or serious security concerns for human review.

11. Provide the customer with clear next steps.

12. Avoid exposing information belonging to other customers.

==========

70. ACCOUNT SECURITY PRINCIPLES

==========

The following principles apply to Hulu Beje customer accounts:

1. Customers should protect their account credentials.
2. Passwords must remain confidential.
3. One-time passwords and authentication codes must remain confidential.
4. Customers should use accurate account information.
5. Customers should keep recovery information accessible.
6. Account-specific information should be disclosed only to authorized persons.
7. Customer support should not request passwords.
8. Customers should be cautious of phishing and impersonation.
9. Unexpected account changes should be reported.
10. Unknown orders should be investigated promptly.

11. Payment information should be protected.

12. Customers should secure lost or shared devices.

13. Customers should log out from shared or public devices.

14. Account recovery may require identity verification.

15. Security incidents may require human review.

16. Customers should provide only information necessary for support.

17. Customers should not attempt to access another customer's account.

18. Customers should not misuse account recovery or security processes.

19. Account information should be handled as private information.

20. Security concerns should be reported promptly.

==========

71. FINAL CUSTOMER ACCOUNT AND SECURITY POLICY

==========

Hulu Beje customer accounts are intended to provide customers with secure access to applicable services, orders, profile information, and other account-related features.

Customers are responsible for protecting their passwords, authentication codes, recovery information, and other confidential account credentials.

Customers should never provide passwords, one-time passwords, authentication codes, or unnecessary payment security information to unknown or unverified persons.

Customers should keep their account information accurate and should promptly report unexpected changes, unknown orders, suspicious payment activity, or suspected unauthorized account access.

Account-specific information should only be provided to appropriately verified customers or other authorized persons. Information belonging to another customer should remain private.

Customers should be cautious of phishing messages, fraudulent communications, fake support requests, and other attempts to obtain confidential information.

Password recovery and account recovery may require appropriate verification. Customers should use authorized recovery procedures and contact support when normal recovery is unsuccessful.

If an account is suspected to be compromised, the customer should take reasonable steps to secure the account, review recent activity, and

contact Hulu Beje support promptly.

Security-sensitive cases, account takeover concerns, identity disputes, unknown transactions, and other serious account problems may require additional review.

Customer account security depends on both appropriate business safeguards and responsible customer behavior. Customers should protect their credentials, verify suspicious requests, maintain accurate account information, and report security concerns promptly.
