HULU BEJE — PRIVACY AND DATA PROTECTION POLICY

Document ID: 12

Document Type: Privacy and Data Protection Policy

Company: Hulu Beje

Scope: Customer Data, Seller Data, Personal Information, Privacy, Data Security, Data Access, Data Retention, Data Requests, and Privacy Complaints

==========

1. PURPOSE OF THIS POLICY

==========

This document explains the general privacy and data protection principles applicable to Hulu Beje.

The purpose of this policy is to explain:

- What types of information may be collected.
- Why information may be collected.
- How information may be used.
- How customer information should be protected.
- How seller information should be handled.
- How delivery and order information may be used.
- How payment information should be protected.
- How customer support information should be handled.
- How privacy concerns may be reported.
- How customers may request appropriate changes to their personal information.
- How information should be protected against unauthorized access or disclosure.

Specific privacy practices may depend on the service, customer relationship, seller arrangement, transaction, applicable business requirements, and applicable laws and regulations.

==========

2. PRIVACY PRINCIPLES

==========

Hulu Beje should handle personal information according to the following general principles:

1. Purpose

   Information should be collected and used for legitimate business purposes.

2. Minimization

   Only information reasonably necessary for the relevant purpose should be requested or used.

3. Accuracy

Information should be kept reasonably accurate and updated where necessary.

4. Security

Appropriate safeguards should be used to protect information.

5. Confidentiality

Personal information should not be unnecessarily disclosed.

6. Transparency

Customers should receive understandable information about relevant privacy practices.

7. Access control

Access to personal information should be limited to authorized purposes.

8. Retention

Information should not be kept longer than reasonably necessary for its applicable purpose, subject to business, legal, security, and recordkeeping requirements.

9. Accountability

Privacy concerns should be taken seriously and reviewed appropriately.

10. Respect for customer rights

Applicable customer requests regarding personal information should be handled according to relevant policies and laws.

==========

3. WHAT IS PERSONAL DATA?

==========

Personal data is information that relates to an identifiable person.

Examples may include:

- Name
- Phone number
- Email address
- Delivery address
- Account information
- Order information
- Transaction information
- Customer support information
- Certain device or usage information
- Other information that may identify or relate to a customer

Not every piece of information associated with a business activity is necessarily personal data.

The handling of information depends on its nature, purpose, and applicable requirements.

==========

4. CUSTOMER DATA CATEGORIES

==========

Depending on the services used, Hulu Beje may handle categories of information such as:

- Account information
- Contact information
- Delivery information
- Order information
- Product information associated with an order
- Payment and transaction information

- Customer support information

- Return and refund information

- Promotion information

- Seller-related information

- Security-related information

- General service usage information where applicable

==========

5. ACCOUNT AND PROFILE INFORMATION

==========

Account information may include:

- Name

- Email address

- Phone number

- Account preferences

- Saved addresses

- Account status

- Other information needed to maintain the customer account

Customers should provide accurate information where required.

Customers may be able to update certain account information through the applicable account-management process.

==========

6. CONTACT INFORMATION

==========

Contact information may include:

- Phone number
- Email address
- Other contact information provided for customer service or order communication

Contact information may be used for legitimate purposes such as:

- Order communication
- Delivery coordination
- Customer support
- Account-related communication
- Important service notices
- Other authorized business communication

==========

7. DELIVERY AND ADDRESS DATA

==========

Delivery information may include:

- Recipient name
- Phone number
- City
- Region
- Sub-city where applicable
- Woreda where applicable
- Kebele where applicable

- Neighborhood
- Street or road
- House or building information
- Apartment or unit information
- Landmark
- Delivery instructions

Delivery information should be used for legitimate purposes such as:

- Preparing an order
- Delivering an order
- Resolving delivery problems
- Supporting customers
- Handling address changes
- Other purposes directly related to the delivery service

==========

8. ORDER INFORMATION

==========

Order information may include:

- Order number
- Products ordered
- Product quantities
- Selected variants
- Order date
- Order status
- Delivery information

- Seller information

- Payment status

- Return information

- Refund information

- Cancellation information

Order information should be handled as customer-specific information and should not be unnecessarily disclosed.

==========

9. PAYMENT AND TRANSACTION INFORMATION

==========

Payment-related information may include:

- Payment method

- Transaction reference

- Payment status

- Payment amount

- Refund information

- Transaction date

- Other information required to manage the transaction

Payment information should be protected appropriately.

Customers should never be asked to provide:

- Passwords

- OTPs

- Authentication codes

- CVV

- Full payment card numbers

Only information reasonably necessary for legitimate payment support should be requested.

==========

10. CUSTOMER SUPPORT INFORMATION

==========

Customer support interactions may contain information such as:

- Customer questions

- Complaints

- Order information

- Delivery information
- Payment-related information
- Return information
- Account-related information
- Requested resolutions
- Support case information

Support information should be used to:

- Respond to customer requests
- Resolve customer complaints
- Investigate service problems
- Improve customer service
- Maintain appropriate business records
- Handle escalated cases where necessary

==========

11. SELLER INFORMATION

==========

Seller information may include:

- Seller name
- Business information
- Contact information
- Product information
- Order information
- Performance information
- Transaction information

- Payment or payout information

- Complaint information

- Policy compliance information

Seller information should be protected and used only for legitimate business purposes.

==========

12. PRODUCT INFORMATION AND CUSTOMER DATA

==========

Product information itself may not always be personal data.

However, product information associated with a specific customer may become customer-related information.

For example:

- A product in a public catalog is general product information.

- A product purchased by a particular customer becomes part of that customer's order information.

Customer-specific product information should therefore be handled appropriately.

==========

13. WHY INFORMATION MAY BE COLLECTED

==========

Hulu Beje may need information for legitimate purposes such as:

- Creating and maintaining customer accounts

- Processing orders
- Processing payments
- Delivering products
- Providing customer support
- Handling returns
- Processing refunds
- Managing exchanges
- Managing promotions
- Supporting seller transactions
- Preventing fraud
- Protecting account security
- Investigating complaints
- Improving services
- Maintaining appropriate business records
- Meeting applicable legal or regulatory requirements

==========

14. DATA MINIMIZATION

==========

Hulu Beje should collect and use only information reasonably necessary for the intended purpose.

For example:

A delivery problem may require:

- Order information
- Delivery address
- Contact information

- Relevant delivery details

It generally does not require:

- Account password

- OTP

- CVV

- Full card number

- Unrelated personal information

Customers should not be asked to provide information that is unnecessary for resolving their issue.

==========

15. PURPOSE LIMITATION

==========

Information collected for one legitimate purpose should not automatically be used for unrelated purposes.

For example:

Delivery information may be used to deliver an order.

It should not automatically be treated as permission to use the customer's address for unrelated activities.

Customer information should be used consistently with the applicable purpose and privacy requirements.

==========

16. AUTHORIZED USE OF CUSTOMER INFORMATION

==========

Customer information should only be accessed or used by authorized persons or parties for legitimate purposes.

Examples may include:

- Customer support
- Order fulfillment
- Delivery
- Payment processing
- Return processing
- Refund processing
- Account support
- Security review
- Authorized business operations

==========

17. CUSTOMER CONSENT

==========

Where consent is required for a particular activity, the appropriate consent process should be followed.

Consent requirements may vary depending on:

- Type of information
- Purpose
- Communication
- Marketing activity
- Applicable law

- Business arrangement

Customers should not be assumed to have provided consent for unrelated activities merely because they created an account or placed an order.

==========

18. CUSTOMER ACCOUNT SECURITY

==========

Customers are responsible for protecting their account credentials.

Customers should:

- Use appropriate passwords.

- Avoid sharing passwords.

- Protect authentication information.

- Avoid entering credentials into suspicious requests.

- Report suspicious account activity.

Hulu Beje support should never request a customer's password.

==========

19. SENSITIVE AUTHENTICATION INFORMATION

==========

Customers should never be asked to disclose:

- Passwords

- OTPs

- Authentication codes

- CVV

- Full card numbers

- Private security credentials

If account or payment verification is required, customers should use the appropriate secure verification process.

==========

20. PAYMENT SECURITY

==========

Payment information requires appropriate protection.

Customers should avoid sharing sensitive payment information through ordinary customer support communication.

Support should not request:

- Full card numbers

- CVV

- OTPs

- Passwords

- Authentication codes

When investigating a payment issue, support should rely on appropriate transaction information rather than asking customers to disclose confidential payment credentials.

==========

21. DATA ACCESS CONTROLS

==========

Access to personal information should be limited according to legitimate business responsibilities.

For example:

- Delivery personnel may need delivery information.
- Customer support may need relevant order information.
- Sellers may need information necessary to fulfill applicable orders.
- Payment-related personnel may need relevant transaction information.
- Other personnel should not receive customer information without an appropriate purpose.

Access should be limited to what is reasonably necessary.

==========

22. CUSTOMER-SPECIFIC DATA SEPARATION

==========

Information belonging to one customer must not be disclosed to another customer.

Examples of information that must remain private include:

- Orders
- Addresses
- Phone numbers
- Email addresses
- Payment information
- Support conversations
- Account information
- Refund information

- Delivery information

A customer asking for another customer's information does not create authorization to disclose it.

==========

23. SELLER ACCESS TO CUSTOMER DATA

==========

Where sellers need customer information to fulfill an order, access should be limited to information reasonably necessary for that purpose.

For example, a seller may need:

- Recipient name

- Delivery address

- Contact information

- Order details

The seller should not use customer information for unrelated purposes without appropriate authorization.

==========

24. DELIVERY PARTNER INFORMATION

==========

Delivery arrangements may require certain customer information to be shared with an appropriate delivery party.

Information may include:

- Recipient name

- Delivery address

- Phone number

- Order details necessary for delivery

- Delivery instructions

Only information reasonably necessary for delivery should be shared.

==========

25. PAYMENT PROVIDERS AND SERVICE PROVIDERS

==========

Hulu Beje may work with third-party providers where necessary to support business services.

Depending on the service, these may include:

- Payment service providers

- Delivery providers

- Customer service providers

- Communication providers

- Other authorized service providers

The information shared should be limited to what is reasonably necessary for the relevant service and subject to applicable privacy and business requirements.

==========

26. THIRD-PARTY DATA HANDLING

==========

When customer information is handled by another service provider, appropriate safeguards and business requirements should apply.

Customer information should not be shared simply because another party requests it.

There should be a legitimate reason for the disclosure.

==========

27. DATA RETENTION

==========

Personal information should be retained only for as long as reasonably necessary for its applicable purpose, subject to:

- Legal requirements

- Business record requirements

- Financial record requirements

- Security requirements

- Dispute handling

- Fraud prevention

- Other legitimate obligations

Different types of information may need to be retained for different periods.

Specific retention periods should not be assumed unless established by the applicable Hulu Beje policy or requirement.

==========

28. DELETION AND ACCOUNT DEACTIVATION

==========

Customers may request account deletion or deactivation where such options are available.

Deleting or deactivating an account does not necessarily mean that all information can immediately be removed.

Certain information may need to be retained because of:

- Completed transactions
- Financial records
- Legal obligations
- Security investigations
- Fraud prevention
- Disputes
- Other legitimate business requirements

==========

29. DATA CORRECTION

==========

Customers should be able to request correction of inaccurate personal information where applicable.

Examples include:

- Incorrect name
- Incorrect phone number
- Incorrect email address
- Incorrect account information
- Incorrect saved address

The correction process may require appropriate verification.

==========

30. CUSTOMER ACCESS REQUESTS

==========

Where applicable, customers may request information about personal data associated with their account.

Such requests may be subject to:

- Identity verification

- Privacy restrictions

- Information belonging to other people

- Legal or business limitations

A request should not result in disclosure of another person's private information.

==========

31. CUSTOMER DELETION REQUESTS

==========

Customers may request deletion of personal information where applicable.

Deletion may be subject to legitimate exceptions, such as:

- Legal obligations

- Financial records

- Completed transactions

- Security requirements

- Fraud prevention

- Disputes

- Other legitimate retention requirements

==========

32. CUSTOMER PRIVACY COMPLAINTS

==========

Customers may contact Hulu Beje about concerns such as:

- Unauthorized disclosure

- Incorrect personal information

- Unwanted communication

- Improper use of information

- Account privacy concerns

- Delivery information concerns

- Seller misuse of customer information

- Payment information concerns

- Requests to access or correct information

Privacy complaints should be documented and reviewed appropriately.

==========

33. PREVENTING CROSS-CUSTOMER DISCLOSURE

==========

Customer information must be kept separate.

For example, support must not tell Customer A:

- Customer B's address

- Customer B's phone number

- Customer B's order details

- Customer B's payment information

- Customer B's refund information

- Customer B's support conversation

If a customer accidentally receives another customer's information, the matter should be reported and reviewed as a privacy concern.

==========

34. HUMAN SUPPORT ACCESS TO CUSTOMER DATA

==========

Customer support personnel may need access to certain customer information to resolve an issue.

Such access should be:

- Relevant

- Limited

- Authorized

- Appropriate for the support case

Support personnel should not access unrelated customer information merely because it is available.

==========

35. SUPPORT CASE DATA

==========

Support cases may contain customer information necessary to resolve the customer's issue.

Support case records should:

- Contain relevant information.
- Avoid unnecessary personal information.
- Avoid unnecessary sensitive information.
- Be handled confidentially.
- Be accessible only for legitimate business purposes.

==========

36. CUSTOMER DATA IN COMPLAINTS

==========

When creating or escalating a complaint, only relevant customer information should be included.

A useful complaint may contain:

- Customer issue
- Relevant order reference
- Relevant product
- Relevant transaction information
- Description of the problem
- Requested resolution

It should not unnecessarily contain:

- Passwords

- OTPs

- CVV

- Full card numbers

- Unrelated personal information

==========

37. FRAUD PREVENTION

==========

Customer information may be used for legitimate fraud prevention and security purposes.

Examples include:

- Investigating unauthorized transactions

- Investigating suspicious account activity

- Reviewing suspicious orders

- Protecting customer accounts

- Investigating fraudulent seller activity

Fraud prevention activities should use appropriate information and protect customer privacy.

==========

38. SECURITY INCIDENTS

==========

A security incident may involve:

- Unauthorized account access

- Unauthorized disclosure

- Suspicious payment activity

- Misuse of customer information

- Loss of confidential information

- Other unauthorized access or use

Security incidents should be reported and reviewed promptly according to the applicable business process.

==========

39. PRIVACY INCIDENTS

==========

A privacy incident may include:

- Customer information sent to the wrong person

- Unauthorized access

- Unnecessary disclosure

- Incorrect customer information being exposed

- Seller misuse of customer information

- Unintended disclosure of delivery information

Privacy incidents should be documented and reviewed appropriately.

==========

40. SECURITY INCIDENT RESPONSE

==========

When a potential security or privacy incident is identified, appropriate steps may include:

1. Identify the reported problem.

2. Protect affected information where possible.

3. Determine what information may be involved.

4. Restrict inappropriate access where necessary.

5. Review the incident.

6. Determine appropriate customer communication.

7. Take corrective action where appropriate.

8. Maintain appropriate records.

==========

41. CUSTOMER NOTIFICATION

==========

Where a privacy or security incident requires customer notification, the appropriate communication should provide relevant information without unnecessarily exposing confidential details.

Customers should be told what they need to know to protect themselves and understand the situation, subject to applicable requirements.

==========

42. CHILDREN AND MINORS

==========

Information relating to children or minors should receive appropriate privacy protection.

Where specific age-related requirements apply, the applicable Hulu Beje policies and legal requirements should be followed.

Support should avoid collecting unnecessary information about children.

==========

43. INTERNATIONAL DATA TRANSFERS

==========

Some business services may involve service providers or business activities across different countries.

Where personal information is transferred internationally, applicable privacy requirements and business safeguards should be considered.

Specific transfer arrangements should not be assumed without confirmed information.

==========

44. COOKIES AND SESSION INFORMATION

==========

Where Hulu Beje uses cookies, session information, or similar technologies, they may support activities such as:

- Account sessions
- Customer preferences
- Website functionality
- Security
- Service improvement
- Other legitimate website activities

Applicable notices or settings should explain relevant choices where required.

==========

45. USAGE AND DEVICE INFORMATION

==========

Depending on the service, Hulu Beje may handle certain general information related to service usage or customer devices.

Examples may include:

- General device information

- Browser information

- Access time

- General service activity

- Security-related information

Such information may be used for legitimate purposes such as:

- Security

- Troubleshooting

- Service improvement

- Fraud prevention

- Maintaining service reliability

Only information reasonably necessary for the applicable purpose should be used.

==========

46. CUSTOMER COMMUNICATION DATA

==========

Customer communications may include:

- Support messages

- Order-related communication

- Delivery communication

- Complaint information

- Return information

- Account-related communication

Such information should be handled appropriately and used for legitimate business purposes.

==========

47. MARKETING COMMUNICATION

==========

Marketing communication should be handled according to applicable business and privacy requirements.

Depending on the applicable arrangement, customers may receive information about:

- Promotions

- Discounts

- New products

- Special offers

- Other business communications

Customers should not be assumed to have agreed to unrelated marketing merely because they created an account or placed an order where separate consent or applicable requirements apply.

==========

48. CUSTOMER COMMUNICATION PREFERENCES

==========

Where applicable, customers may have options concerning certain communications.

Preferences may include:

- Marketing communication

- Promotional communication

- Certain notification settings

Important service communication, such as order or security information, may be treated differently from optional promotional communication.

==========

49. DATA ACCURACY

==========

Hulu Beje should take reasonable steps to maintain accurate customer information.

Customers can help by updating:

- Name
- Phone number
- Email address
- Delivery address
- Other relevant account information

Customers should report incorrect information when they become aware of it.

==========

50. ACCOUNT INFORMATION VS ORDER INFORMATION

==========

A customer's account information and a specific order's information may be different.

For example:

- A customer may update their saved address.

- An existing order may still contain the original delivery address.

Updating account information does not automatically mean that existing orders have been changed.

Customers should confirm the information associated with a specific order when necessary.

==========

51. DATA RETENTION FOR ORDERS

==========

Order-related information may need to be retained after an order is completed.

Reasons may include:

- Transaction records
- Customer support
- Refunds
- Returns
- Warranty
- Disputes
- Financial records

- Security

- Applicable legal requirements

The exact retention period depends on the applicable requirements.

==========

52. DATA RETENTION FOR SUPPORT CASES

==========

Support case information may need to be retained for legitimate reasons such as:

- Resolving ongoing complaints

- Reviewing escalated cases

- Handling disputes

- Maintaining service records

- Security investigations

- Quality improvement

- Applicable legal or business requirements

The exact retention period should not be invented where it has not been established.

==========

53. DATA RETENTION FOR SELLER INFORMATION

==========

Seller information may be retained for legitimate purposes such as:

- Seller account management

- Transactions

- Payouts

- Disputes

- Policy compliance

- Customer complaints

- Security

- Applicable legal or business requirements

==========

54. DATA DELETION LIMITATIONS

==========

Deletion of personal information may not always be immediate or complete.

Information may need to remain available when necessary for:

- Legal obligations
- Financial records
- Completed transactions
- Fraud prevention
- Security investigations
- Dispute resolution
- Other legitimate requirements

Customers should receive accurate information about what can and cannot be deleted.

==========

55. CUSTOMER IDENTITY VERIFICATION

==========

Identity verification may be required before providing account-specific information or processing certain privacy requests.

Verification should use appropriate methods.

Support should never request:

- Passwords
- OTPs
- CVV
- Full card numbers
- Other confidential credentials unnecessarily.

==========

56. AUTHORIZED REPRESENTATIVES

==========

A person requesting access to another customer's information may need appropriate authorization.

Support should not disclose customer information merely because another person claims to be:

- A friend
- Family member
- Coworker
- Employee
- Business representative

Appropriate authorization or verification may be required.

==========

57. EMPLOYEE AND SUPPORT CONFIDENTIALITY

==========

People handling customer information should treat it as confidential.

They should:

- Access information only for legitimate purposes.
- Avoid unnecessary disclosure.
- Avoid copying information unnecessarily.
- Protect customer records.
- Follow applicable privacy and security procedures.

==========

58. SELLER PRIVACY RESPONSIBILITIES

==========

Sellers should:

- Protect customer information.
- Use customer information only for legitimate purposes.
- Avoid unnecessary disclosure.
- Avoid unrelated marketing using customer information.
- Never request passwords or authentication credentials.
- Report suspected misuse or security incidents.

==========

59. CUSTOMER RESPONSIBILITIES FOR PRIVACY

==========

Customers should:

- Protect account passwords.
- Avoid sharing OTPs.
- Avoid sharing authentication codes.
- Avoid sharing CVV.
- Avoid sharing full payment card numbers.
- Use caution with suspicious messages.
- Keep account information accurate.
- Report suspicious activity.

- Report privacy concerns promptly.

==========

60. PHISHING AND PRIVACY FRAUD

==========

Customers should be cautious of messages claiming to represent Hulu Beje that request:

- Passwords
- OTPs
- Authentication codes
- CVV
- Full card numbers
- Unnecessary identity information

- Unusual payments

Customers should use trusted Hulu Beje communication and support channels when verifying suspicious requests.

==========

61. DATA SHARING PRINCIPLES

==========

Customer information should only be shared when there is a legitimate reason.

Examples of legitimate sharing may include:

- Delivering an order

- Processing a payment

- Handling a return

- Providing customer support

- Managing seller fulfillment

- Protecting security

- Meeting applicable legal requirements

Information should not be shared merely because another party requests it.

==========

62. PUBLIC INFORMATION VS PRIVATE INFORMATION

==========

Some information may be publicly visible, such as:

- Product names
- Product descriptions
- Public seller names where applicable
- Public business information

Other information is private, such as:

- Customer address
- Customer phone number
- Customer order history
- Payment information
- Support conversations
- Account information

Public availability of one piece of information does not make all related customer information public.

==========

63. PRIVACY AND CUSTOMER SUPPORT

==========

When handling privacy questions, support should:

1. Identify the customer's concern.

2. Determine what information is involved.

3. Avoid requesting unnecessary personal information.

4. Verify the customer when necessary.

5. Explain the applicable privacy process.

6. Escalate when the concern requires additional review.

7. Avoid disclosing another person's information.

==========

64. PRIVACY AND DELIVERY SUPPORT

==========

Delivery support may require access to:

- Delivery address
- Phone number
- Recipient name
- Order information
- Delivery instructions

This information should only be used for legitimate delivery-related purposes.

A delivery issue does not authorize disclosure of unrelated customer information.

==========

65. PRIVACY AND PAYMENT SUPPORT

==========

Payment support may require:

- Order reference
- Transaction reference
- Payment status
- Payment amount
- Payment date

- Refund information

Support should not request:

- Full card number

- CVV

- OTP

- Password

- Authentication code

==========

66. PRIVACY AND RETURN SUPPORT

==========

Return support may require:

- Order information
- Product information
- Return reason
- Return status
- Delivery information
- Refund information

Only information relevant to the return should be collected or used.

==========

67. PRIVACY AND SELLER DISPUTES

==========

Seller disputes may involve information about both customers and sellers.

Support should:

- Share only necessary information.
- Avoid exposing unrelated customer information.
- Avoid exposing confidential seller information unnecessarily.
- Keep disputed information appropriately separated.
- Use the minimum information needed to resolve the case.

==========

68. PRIVACY AND BUSINESS RECORDS

==========

Hulu Beje may maintain business records necessary to operate the service.

These may include:

- Orders
- Payments
- Refunds
- Returns
- Customer support cases
- Seller records
- Security records
- Other business records

Records should be handled according to applicable privacy, security, and business requirements.

==========

69. PRIVACY COMPLAINT SCENARIOS

==========

SCENARIO 1 — CUSTOMER RECEIVES ANOTHER CUSTOMER'S INFORMATION

Customer:

"I received an order message containing another person's address."

Handling:

Treat the situation as a potential privacy incident and escalate it for appropriate review.

SCENARIO 2 — CUSTOMER ASKS FOR ANOTHER CUSTOMER'S ADDRESS

Customer:

"Give me the address of the person who received my package."

Handling:

Do not disclose another customer's address. Handle the delivery issue through the appropriate support process.

SCENARIO 3 — SELLER REQUESTS CUSTOMER PASSWORD

Customer:

"The seller asked me for my password."

Handling:

Customers should never provide passwords to sellers. The concern should be reported for review.

SCENARIO 4 — CUSTOMER REPORTS UNKNOWN ACCOUNT ACTIVITY

Customer:

"Someone changed information in my account."

Handling:

Treat the report as a potential account security concern and direct the customer through the appropriate account recovery or security review process.

SCENARIO 5 — CUSTOMER WANTS PERSONAL DATA DELETED

Customer:

"I want my information deleted."

Handling:

Explain the applicable deletion process and any limitations caused by legitimate legal, financial, security, dispute, or business record requirements.

SCENARIO 6 — CUSTOMER WANTS TO CORRECT INFORMATION

Customer:

"My phone number on my account is wrong."

Handling:

Explain the applicable account information correction process.

SCENARIO 7 — CUSTOMER ASKS WHY AN ADDRESS IS NEEDED

Customer:

"Why do you need my address?"

Response:

"The delivery address is needed to identify where your order should be delivered and to support delivery coordination."

SCENARIO 8 — CUSTOMER SHARES AN OTP

Customer:

"I sent the OTP to someone who said they were from Hulu Beje."

Handling:

The customer should be advised not to share authentication codes and should follow the appropriate account security process. The incident may require security review.

==========

70. FREQUENTLY ASKED QUESTIONS

==========

Q1. What information may Hulu Beje collect?

A:

Depending on the services used, Hulu Beje may handle account, contact, delivery, order, transaction, support, seller, security, and other service-related information.

Q2. Why does Hulu Beje need my address?

A:

An address may be necessary to deliver an order and support delivery-related services.

Q3. Why does Hulu Beje need my phone number?

A:

A phone number may be needed for account communication, order communication, delivery coordination, or customer support.

Q4. Does Hulu Beje need my password?

A:

No. Customers should never provide their password to customer support, sellers, or other people claiming to represent Hulu Beje.

Q5. Should I provide my OTP to support?

A:

No. Customers should never provide OTPs or authentication codes to support or sellers.

Q6. Should I provide my CVV?

A:

No. Customers should never provide their CVV through ordinary support communication.

Q7. Should I provide my full card number?

A:

Customers should not provide full payment card numbers through ordinary customer support communication.

Q8. Can a seller see my address?

A:

A seller may receive delivery information necessary to fulfill an applicable order, subject to the relevant business arrangement.

Q9. Can sellers use my information for other purposes?

A:

Customer information should only be used for legitimate and authorized purposes.

Q10. Can another customer see my order?

A:

Customer-specific order information should remain private and should not be disclosed to unrelated customers.

Q11. Can I correct my personal information?

A:

Where applicable, customers may request correction of inaccurate personal information.

Q12. Can I delete my account?

A:

Account deletion or deactivation may be available where applicable, but certain information may need to be retained for legitimate legal, financial, security, dispute, or business reasons.

Q13. Does deleting my account delete everything immediately?

A:

Not necessarily. Certain information may need to remain available for legitimate retention requirements.

Q14. How long does Hulu Beje keep my information?

A:

Retention periods may differ depending on the type of information and applicable business, legal, financial, security, and recordkeeping requirements. An exact period should not be assumed unless specified by the applicable policy.

Q15. What if I receive another customer's information?

A:

Report the issue promptly so it can be reviewed as a potential privacy incident.

Q16. What if I think someone accessed my account?

A:

Report the issue and follow the appropriate account security and recovery process.

Q17. Can I ask what information Hulu Beje has about me?

A:

Where applicable, customers may request access to personal information associated with their account, subject to verification and applicable limitations.

Q18. Can I ask Hulu Beje to delete my personal information?

A:

Where applicable, customers may request deletion, subject to legitimate legal, financial, security, dispute, or business record requirements.

Q19. Does Hulu Beje share information with delivery providers?

A:

Information may be shared with an appropriate delivery provider when necessary to fulfill an order, subject to applicable requirements.

Q20. Does Hulu Beje share information with payment providers?

A:

Payment-related information may be handled by appropriate payment service providers where necessary to process or support transactions.

Q21. Can customer support see my information?

A:

Support personnel may access information necessary to resolve a customer issue, subject to appropriate access controls and business purposes.

Q22. Can every employee access my information?

A:

Access to customer information should be limited according to legitimate business responsibilities.

Q23. What should I do if someone asks me for my Hulu Beje password?

A:

Do not provide it. Report suspicious requests through the appropriate support process.

Q24. What should I do if someone asks for my OTP?

A:

Do not provide it. Authentication codes should remain confidential.

Q25. What if a seller asks for my payment card information?

A:

Do not provide sensitive payment credentials to the seller. Report the request through the appropriate support process.

==========

71. PRIVACY SUPPORT REQUEST FORMAT

==========

When a customer submits a privacy-related request, the following information may be useful:

REQUEST TYPE:

[Access / Correction / Deletion / Privacy Complaint / Security Concern / Other]

CUSTOMER CONCERN:

[Description of the issue]

==========

73. PRIVACY AND DATA PROTECTION PRINCIPLES

==========

Hulu Beje should:

- Collect information for legitimate purposes.

- Use information for appropriate purposes.

- Minimize unnecessary data collection.

- Protect customer information.

- Protect seller information.

- Restrict access to authorized purposes.

- Prevent cross-customer disclosure.

- Protect payment information.

- Never request passwords, OTPs, CVV, full card numbers, or authentication codes unnecessarily.

- Protect delivery addresses and contact information.

- Handle customer support records appropriately.

- Handle seller information appropriately.

- Provide appropriate processes for access, correction, and deletion where applicable.

- Review privacy complaints.

- Review potential security incidents.

- Maintain appropriate business records.

- Retain information only as long as reasonably necessary, subject to applicable requirements.

- Communicate privacy practices clearly.

- Follow applicable laws and regulations.

==========

74. FINAL POLICY STATEMENT

==========

Customer and seller information is an important part of Hulu Beje's business operations and should be handled responsibly.

Information should be collected and used only for legitimate purposes and should be limited to what is reasonably necessary.

Customer information such as names, contact details, addresses, orders, transactions, support conversations, and account information should be protected from unnecessary access or disclosure.

Sellers and service providers should only receive information necessary for legitimate business activities.

Customers should never be asked to provide passwords, OTPs, authentication codes, CVV, full payment card numbers, or other confidential credentials through ordinary support communication.

Customers may have applicable rights to access, correct, or request deletion of their personal information, subject to verification and legitimate legal, financial, security, dispute, and business record requirements.

Privacy and security incidents should be reported and reviewed appropriately.

Specific privacy practices, retention periods, data-sharing arrangements, and legal requirements may vary depending on the circumstances and applicable laws and regulations.

The overall objective of this policy is to protect personal information, minimize unnecessary data use, maintain appropriate confidentiality, and provide customers and sellers with clear and responsible privacy practices.
